PROFILE

Motivated Software Engineering student from Karachi, Pakistan with hands-on experience in C#, PHP, ASP.NET Core, WordPress and SQL. I have independently built real-world projects including a Hospital Management System and a Guest House Management System. I focus on delivering clean, efficient and user-friendly software solutions on time.

WORK EXPERIENCE

Freelance Software Developer Jan 2024 – Present
Self-Employed

- Built Guest House Management System in C# with room booking and CRUD operations
- Developed Hospital Management System with patient registration and SQL database
- Created Banquet Booking Website using WordPress, Elementor and WooCommerce
- Delivered clean, well-documented code with full source code handover
